

About the Series

This is the ninth in a series of booklets that SAGE is presenting to the system administration community. They are intended to fill a void in the current information structure, presenting topics in a thorough, refereed fashion but staying small enough and flexible enough to grow with the community. Therefore, these booklets will be “living documents” that are updated as needed.

Series Editor: Rik Farrow

#2: A Guide to Developing Computing Policy Documents

Edited by Barbara L. Dijker

#3: System Security: A Management Perspective

By David Oppenheimer, David Wagner, and Michele D. Crabb

Edited by Dan Geer

#4: Educating and Training System Administrators: A Survey

By David Kuncicky and Bruce Alan Wynn

#5: Hiring System Administrators

By Gretchen Phillips

#6: A System Administrator's Guide to Auditing

By Geoff Halprin

#7: System and Network Administration for Higher Reliability

By John Sellens

#8: Job Descriptions for System Administrators, Revised and Expanded Edition

Edited by Tina Darmohray

#8: Backups and Recovery

W. Curtis Preston and Hal Skelly

About SAGE and USENIX

SAGE, The System Administrators Guild, is a Special Technical Group within the USENIX Association dedicated to advancing the profession of system administration.

USENIX is the Advanced Computing Systems Association.

Contents

1. Overview 1

Why Do We Make Backups 1

Backups and Disaster Recovery 2

Back Up Everything 3

Organize 4

Protect Against Disasters 4

Document 5

Test Continually 5

The What, When, and How 5

What to Back Up 5

When to Back Up 6

Deciding How to Back Up 7

Concepts 10

Dump Levels 10

Grandfather, Father, Son 10

Towers of Hanoi and Enhanced Towers of Hanoi 10

Volume Storage Management 12

Bare Metal Recovery 13

2. Survey of Software 15

Native Utilities 15

tar 15

cpio 16

dd 16

dump/restore 16

Free Software 18

AMANDA 18

hostdump.sh 22

Backup Software Summary 25

3. Database Backup & Recovery 26

Can It Be Done? 27

What's the Big Deal? 27

Why are we hearing so much about database backups all of a sudden? 28

Why is backing up a database so hard? 28

Why aren't utilities already available to do all this? 28

Can't I just shut down the database and back up the whole system? 29

What Can Happen to an RDBMS? 29

Backing Up an RDBMS 30

Physical and Logical Backups 30

Get Every Instance 32

Transaction Log Dumps Are Not Incremental Backups 32

Do-It-Yourself: Creating Your Own Backup Utility 33

Calling a Professional 34

The Big Three 34

Restoring an RDBMS 36

Loss of Any Nondata Disk 36

Loss of a Data Disk 37

Online Partial Restores 38

Documentation and Testing 39

4. Backup Hardware 40

Disks 40

Single Disks 40

RAID 40

Advanced RAID Storage 41

Fibre Channel ATA RAID 41

Optical 41

Tape 43

Linear 43

Helical Scan 44

Serpentine 45

Robotics 45

5. SAN and NAS 47

What Is a SAN? 47

What Is NAS? 48

SAN vs. NAS: A Summary 48

SAN Backup and Recovery 49

LAN-Free Backups 49

Client-Free Backups 49

Server-Free Backups 50

6. Summary 51

References 52

Definitions 53
